Teacher Comment

Akinwumiju has shown some engagement with the course material, but there is a significant need for improvement in attendance and participation. With only 25% attendance, it has been challenging for Akinwumiju to keep up with the lessons and assignments. The quiz average of 41.33% indicates that there may be gaps in understanding the content. I encourage Akinwumiju to seek help and attend more classes to enhance learning and performance. I believe with dedication and effort, Akinwumiju can achieve better results in the upcoming term.
