

Smart Fan – Project Quotation

Smart LED Display Information Board – Documentation & Pricing

(With Optional Wi-Fi Control & App/Web Management)

Thank you for considering our **Smart LED Display Information Board solution**. This system is designed to display dynamic information such as announcements, advertisements, school updates, church messages, event schedules, business promotions, and public notices.

The LED board can be controlled manually, via Wi-Fi (LAN), or through a dedicated mobile application depending on the selected package size. It is ideal for **schools, churches, banks, hotels, hospitals, offices, event centers, and commercial environments**.

Project Features

1. High-Brightness LED Display Panel

- Clear and bright LED matrix display.
- Suitable for indoor or outdoor installation (depending on specification).
- Supports scrolling text, static messages, and animated effects.
- Adjustable brightness for day and night visibility.

2. Custom Message Display

- Display:
 - Text messages
 - Announcements
 - Date and time
 - Custom promotional messages
- Supports multiple message scheduling.
- Smooth scrolling effects (left, right, up, static display).

3. Control Options (Based on Package)

Wi-Fi / Internet-Based Control (Advanced Version)

- Wi-Fi based IoT control.
- Update messages remotely from anywhere.
- Works with LAN connection

4. Real-Time Clock & Auto Scheduling

- Built-in real-time clock module.
- Automatically displays current date and time.
- Schedule different messages for different times of the day.

5. Power Efficiency & Protection

- Stable power supply system.
- Surge and voltage protection (optional upgrade).
- Energy-efficient LED modules.

6. Durable Enclosure

- 5ft Aluminum or metal casing.
- Weather-resistant option for outdoor installations.

Pricing Plans

We offer flexible pricing depending on display size, control method, and connectivity features.
